So, right about now you wondering why would I use Kinek? The reasons are different for everyone, so we have posted the main ones above. Do you or someone you know fall into any of these categories?

Kinek solves a frustration that many people have, and as we have discovered not too many people know how to fix it. How do I order online and receive my packages when and where I want? We know it is not always easy to do using the current methods offered by couriers but using Kinek makes it easy.

KinekPoints solve the frustration involved with receiving packages from online and catalogue shopping, or even just receiving a package from friends or family. We’ve all dealt with coming home from work to find a “missed delivery” slip on our front door. You then spend the next day or two trying to track it down or arrange to be at home for the next delivery attempt. Sometimes delivery companies will even leave an expensive package sitting on your front step for anyone to come along and take, or for it to be rained or snowed on.

Whichever reason you chose to use Kinek, we have a reliable and safe network to ship your packages to.

\*No matter what KinekPoint you ship to, you will receive an instant text message (SMS) and email notification when it arrives! You can even use Kinek to track your package for you and then pick it up at a time that is convenient for you when it is received at a KinekPoint.

### Canadian cross-border shopping

One of the most popular uses of the KinekPoint network is that we enable almost 15 million Canadians to use our border locations as their US shipping address. Canadians use our border KinekPoints because many e-commerce companies won't ship to Canada. Even if they will ship to Canada, they often charge expensive brokerage and international shipping fees.

Not only can Canadians use our border locations to save on cross border shopping, but they can also use our extensive network of authorized KinekPoint locations throughout the US. Going to Florida on vacation? Order online and have your items waiting for you at a KinekPoint near your hotel when you arrive! Same goes for any other state and city!

By shipping to one of Kinek's many border KinekPoints, Canadians can order from US companies and benefit from the greater selection of products, much lower prices, and a strong Canadian dollar. When your package arrives at one of our border locations, you will receive an instant text message (SMS) and email notification letting you know it is ready to be picked up. You can then drive down at a time convenient for you, pick it up, and bring it back across the border yourself. This lets you save hundreds, and sometimes thousands of dollars on your cross border shopping.

## Wedding Gifts

Many people often travel long distances for weddings or often send gifts even if they are unable to attend. Why pay twice for shipping? Once to receive your gift purchased, and a second time to bring it the wedding. Eliminate hauling their wedding gift across the country when ordering online by having it shipped to a KinekPoint near the bride and groom’s special event so stop paying those extra fees to the airline for packing gifts with your luggage and have it delivered to a KinekPoint.

Kinek solves this by offering an extensive network of conveniently located KinekPoints where users can have their packages shipped to. By using Kinek, you’ll never miss a delivery again and will be able to pick up your package at a time that is convenient for you.

### Vacations/Business trips

Another very popular use of Kinek is while on vacation or on a business trip. Why?

Ever traveled and wished you could mail something ahead to pick up when you arrived? This is becoming more and more popular because airlines are charging more than ever before for checked luggage.

Most hotels won't let you have items shipped to them. By using Kinek, you can have online orders sent to a KinekPoint near your hotel. No need to deal with the hotel or worry about the safety of the package.

RV owners are on the road all the time, moving from state to state. Wouldn't it be great if you could have access to a nationwide network of over 700 delivery locations where you can have online/catalogue orders shipped to?

Business trips. Have a meeting in Miami? Denver? Houston? San Francisco? Anywhere in the United States? Need to have something shipped in advance of the tradeshow. Chances are we have a conveniently located KinekPoint near your destination that you can use to have online orders shipped to. (top)

### Using Kinek is easy! Just follow the 3 step process

Step One:  
Sign up for a Kinek account to get your Kinek #.

Step Two:  
Choose a KinekPoint that is convenient for you.

Step Three:  
Order from your favourite online retailer using your new Kinek shipping address!

After choosing a KinekPoint, your new shipping address will be displayed in your profile. This address includes your Kinek# that is used to notify you once your package arrives. Simply copy and paste this address into any online retailer’s shipping form.

That’s it! Kinek will notify you as soon as your package arrives at your KinekPoint. You can then drop by and pick it up at a time of your convenience.

For Retailers

## Why should an e-commerce company partner with Kinek?

- Guaranteed delivery on the first attempt, improving the customer delivery experience
- Eliminate residential surcharges
- Access to package receiving locations throughout the US and Canada
- Access to our unique network of 28 Border KinekPoints serving the Canadian market

Kinek offers a tremendous service, free of charge, to e-commerce companies. Our network of businesses (we call them KinekPoints) act as parcel receiving locations for your customers. Never again will your customers need to worry about missing a home delivery since they can have their package sent to their local KinekPoint and pick it up from there.

### Partnership options

There are two ways you can partner with Kinek. The first is by using our API to integrate Kinek into your checkout process. This enables a frictionless way for customers to browse and select a KinekPoint to ship to without having to leave your site.

### Want to test the waters a bit first?

Not a problem. You can dip your toes in by simply promoting Kinek to your customers. How? Just paste some text into your Shipping Information section and maybe display a banner or two at the appropriate time. We've got everything ready so just give us a shout and we'll walk you through the best practices. Curious? Give us a shout at [ecomm@kinek.com](mailto:ecomm@kinek.com)

### What about your Canadian Border Network?

Thought you'd never ask. \$70 order and \$30 shipping and brokerage to Canada, sound familiar? By shipping to our Border Network you can entirely eliminate international shipping and brokerage fees for Canadian orders. Needless to say, your boss will be impressed. We have 28 high-volume locations along the US border that Canadians can use as their US shipping address. Since 80% of the Canadian population lives within 60 miles of the border, customers can simply drive down and pick up their package at a time convenient for them. No brokerage, no international shipping. We even offer 30 days complimentary storage too.

For Retailers

What can Kinek do for local businesses?

- Offer unique service to your community
- Increase foot traffic
- Establish new source of revenue
- Ability to engage customers with digital coupons and promotions (coming soon)

By joining the Kinek network, you enable online shoppers in your community to have their orders delivered to your store. This is a great convenience for local online shoppers as most people are not at home during the day and repeatedly come home to a “missed delivery” slip on their door. Time for you to swoop in and save the day.

How it works

Once you register with Kinek (give us a shout at retail@kinek.com to get started) we’ll list your business on our web and mobile apps. Doing this allows Kinek customers to view your business, its hours, and pricing for package receiving. If they like what they see, they can select your store to receive their orders and use a slightly modified version of your address when they order online. The package gets delivered to your store, you receive it, log into your Kinek account (we’ve got an iPhone app too if you’re into that) and type in the customer’s name/Kinek#. This triggers a delivery notification letting them know it’s arrived. You then place it in a safe spot until the customer comes in.
